From the Desk of Vice Chancellor

Dear Esteemed Colleagues and Students,

It gives me immense pleasure to share with you the latest edition of our University Newsletter, highlighting the dynamic academic and extracurricular activities from July to December, 2024. This period has been marked by significant achievements, reflecting our collective dedication towards excellence.

Our faculty and students have played an active role in a range of impactful events, demonstrating the University's multifaceted and extensive initiatives. Ranging from academic events to extension activities, every initiative has enriched the fabric of our academic community. Our faculty members have led a wide range of training sessions and workshops, in addition to participating in various conferences. These opportunities have allowed them to gain new skills and techniques, enhancing their knowledge and fostering the development of innovative research and applications that will influence the future of our professionals.

Our students have shown active participation in various sports events as well as in NSS and NCC activities. Furthermore, they have distinguished themselves by excelling in national-level exams, securing success in the prestigious JRF and SRF exams.

We have engaged in several extension activities, including offering training to farmers on the rearing of goats, pigs and poultry through programs like MAITRI, NLM and others. We've also provided training to field veterinarians as part of the ASCAD Training initiatives. Additionally, under various funded projects, we have distributed goats, poultry and pigs to farmers. These efforts reflect our commitment to not only enhancing academic knowledge but also creating a meaningful impact in the lives of those we serve.

While reading through this newsletter, I encourage you to reflect on the successes shared and consider how you can play a part in advancing our commitment to excellence in teaching, research, extension and extracurricular activities. Together, let's build on the solid foundation we've created and strive for even greater accomplishments in the coming months.

(Mandeep Sharma)
